## About Koha

[Server Information](#)[Perl modules](#)[System information](#)[Koha Team](#)[Licenses](#)[Translations](#)[Koha Timeline](#)

### Server information

Koha version:	3.12.12.000
OS version ('uname -a'):	Linux unfao.koha.ptfsadmin.uk0.bigv.io 3.2.0-4-amd64 #1 SMP Debian 3.2.60-1+deb7u3 x86_64 GNU/Linux
Perl interpreter:	/usr/bin/perl
Perl version:	5.014002
Perl @INC:	/home/koha/kohaclone /etc/perl /usr/local/lib/perl/5.14.2 /usr/local/share/perl/5.14.2 /usr/lib/perl5 /usr/share/perl5 /usr/lib/perl/5.14 /usr/share/perl/5.14 /usr/local/lib/site_perl .
MySQL version:	mysql Ver 14.14 Distrib 5.5.38, for debian-linux-gnu (x86_64) using readline 6.2
Apache version:	Server version: Apache/2.2.22 (Debian)
Zebra version:	Zebra 2.0.59 (C) 1994-2014, Index Data Zebra is free software, covered by the GNU General Public License, and you are welcome to change it and/or distribute copies of it under certain conditions. SHA1 ID: c00bfddb0f3608340d61298acc61dafb167f9b2 Using ICU

Had to do it in 6-8 months, aside from  
some data cleaning tasks

 *kohacon17*

```

    }
    push( @loop_data, \%tag_data );
  }
} # foreach $field end

# if breeding is empty
}
else {

- AGROVOC can be accessed in various ways:
- Online Search & browse (LOD)
- Download Core (available in RDF and NT format)
- Download LOD (available in NT and NQ format)
- Web Services (LOD)
- SPARQL endpoint (LOD)

*Okohacon17*

- AGROVOC is available in the following formats:
- SKOS RDF/XML (English only)
- MySQL (which is used for the AIMS AGROVOC search interface)
- Protégé DB (used internally by VocBench 1.3)
- OWL (the internal model used by VocBench 1.3)
- ISO2709 (used by WebAgris and other CS-ISIS systems)

- Among the various ways and formats available, the following were explored:
  - AGROVOC Core in RDF and NT format
  - AGROVOC LOD in NT and NQ format
  - A search on the SPARQL endpoint
  - A search on the AGROVOC's web interface
  - SKOS RDF/XML (English only)
  - MySQL
  - Protégé DB

- The AGROVOC Core in RDF and NT formats as well as the AGROVOC LOD in NT and NQ formats was inspected but due to the file not easily opened by regular text editor and Notepad++ (a powerful software used to review the text file of records and use RegEx (regular expression) search and replace to prepare the data for data migration), it was shelved.
- SKOS RDF/XML was not considered because of its exclusivity to English terms. But the pattern was taken into account.

### Stage MARC records for import

- Select a MARC file to stage in the import reservoir. It will be parsed, and each valid record staged for later import into the catalog.
- You can enter a name for this import. It may be useful, when creating a record, to remember where the suggested MARC data comes from!
