Alvet | Manager, Library Services Engineering (South West Asia, Oceania, Africa)

# Agenda

Holdings Management  
and  
Publication Finder

Search Depth &  
Breadth of your  
Content  
with EDS

Access Management  
with OpenAthens

# EBSCO Discovery Service (EDS)

1

# Introduction and a little history...

- EBSCO Discovery Service Plugin first implemented in New Zealand back in 2014

Local Data  
Catalog,  
Repository, etc.

YOUR  
**Discovery  
Front End**

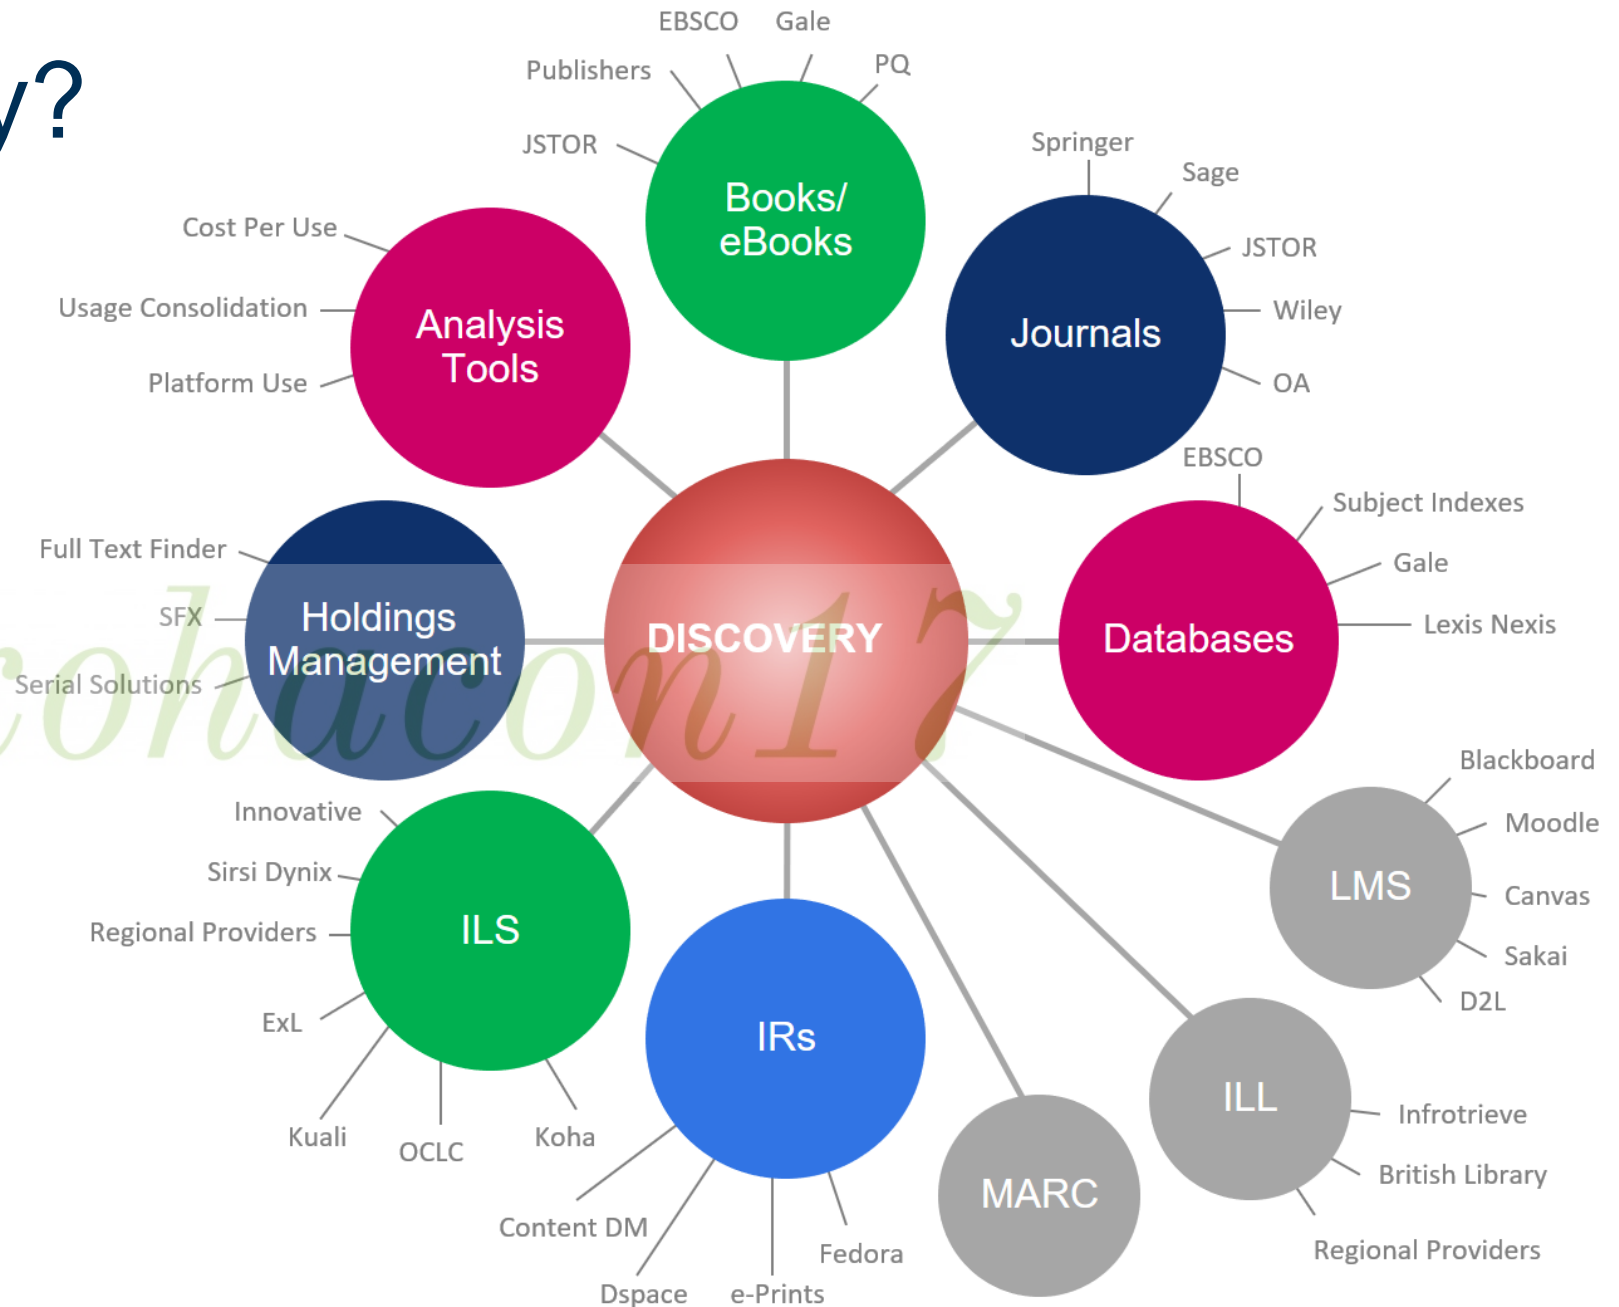

EDS Content &  
Search Engine

# What is Discovery?

- A Google-like tool, simple, fast and efficient.
- Searches as many resources as possible.
- Wide range of options to refine search results.
- Enables easy access to full text or place requests.

EDS has more than  
**3.4 billion**  
searchable records

Content from  
**20k+ publishers**,  
including over 3K open-  
access publishers

**Over 165 apps & 1K non-  
English**  
profiles representing  
**20+ languages**

## I18N/L10N preferences

```

Jun 18 14:18 ar-Arab.inc
Jun 18 14:18 default.inc
Jun 18 14:18 es-ES.inc
Jun 18 14:18 it-IT.inc
Jun 18 14:18 pt-PT.inc
library/plugins/Koha/Plugin/E

```

Value

Enable the following languages on the OPAC:

**Español(es-ES)** ☒

**English**

English United Kingdom (en-GB) ☒

English (en) ☒

العربية(ar-Arab) ☒

Português(pt-PT) ☒

Italiano(it-IT) ☒

Allow  patrons to change the language they see on the OPAC.

- Language file match Koha language pack e.g. es-ES, pt-PT etc.
- default.inc applies when there is no match
- Only default installed to prevent overriding custom language files.

## EDS Settings

## Admin setting updates

EBSCOAdmin Settings are cached by the plugin and updated once a day automatically.

The below update button can be used to manually update setting and it uses the OPACBaseURL system preference which is set to - **"http://192.168.141.137"**

[Click here](#) to set the OPACBaseURL preference if it is empty or does not point to the Koha front-end/OPAC.

Load setting from EBSCOAdmin Now Last Updated on: 18/Jun/2017

Save any configuration changes before clicking the Load button.

# Holdings Management and Publication Finder

2

*kohacon17*

# Full Text Finder

## **Full Text Finder includes:**

- knowledge base
- holdings management tools
- publication search service
- link resolver

## FEATURE

## BENEFIT

### Publication Finder

Allows end users to search for publications in the library's holdings

### Publication discipline browse

Enables users to search for publications by category such as business, art, science, and law.

### Title Matching Feature

Provides direct access to the publication. Users can also use the "search within" feature to search directly within a publication.

### Link Resolver

Use the Full Text Finder link resolver or select another link resolver. The decision is up to you.

### Holdings Management

Leverages the knowledge base to provide known-item results for title level searching. Changes to holdings are seen almost immediately by the end users.

## FEATURE

## BENEFIT

### Publication Finder

Allows end users to search for publications in the library's holdings

### Publication discipline browse

Enables users to search for publications by category such as business, art, science, and law.

### Title Matching Feature

Provides direct access to the publication. Users can also use the "search within" feature to search directly within a publication.

### Link Resolver

Use the Full Text Finder link resolver or select another link resolver. The decision is up to you.

### Holdings Management

Leverages the knowledge base to provide known-item results for title level searching. Changes to holdings are seen almost immediately by the end users.

# Access Management with OpenAthens

3

Libraries desire to provide its users access to licensed information resources but face several challenges due to complex security systems

Helping over 2,000 organisations  
in 46 countries, enable access to  
hundreds of thousands of journals,  
databases and ebooks for over  
4 million end users.

# What is OpenAthens?

*kohacon17*

- Username password system for access to library resources
- Subscriber identification independent of IP
- User categorisation & statistics
- Provides anonymised user ID to publisher for personalisation

# What is OpenAthens for?

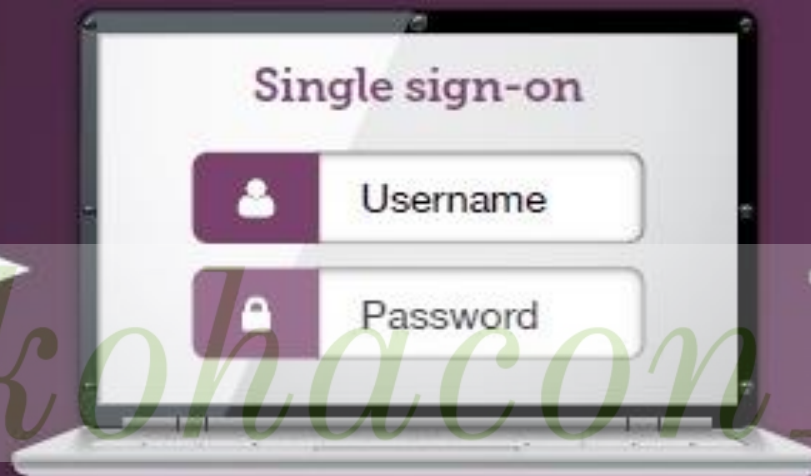

- All accesses to library resources (On network/remote/mobile)
- Organisations where IP authentication doesn't work (no fixed IP)
- To integrate with an organisations own SSO system

Removing  
barriers to  
knowledge

The end-user only needs to remember  
**one username and password**, opening  
up access to all available e-resources

Connecting  
people to  
information

Databases  
& Apps

Research  
& Journals

News &  
Publications

**No need to sign in again** as the end-user moves from resource to resource

Restrict access to categories of individual

# Integration option

Can be integrated with an organisation's own system

- LDAP, Active Directory, portal, LMS
- No new usernames or passwords
- Improves license compliance

Library resources become another application managed via the SSO system

- Improved security

*koha con 17*

## Select local authentication system type.

### LDAP

Connect to an LDAP directory, including Microsoft ActiveDirectory.

### ADFS

Connect using Microsoft ActiveDirectory Federation Services.

### API

Connect via the OpenAthens Local Authentication REST API.

### SirsiDynix

Connect to a SirsiDynix library system for authentication.

### SAML 1.1/2.0

Connect to an local identity provider using SAML.

# Koha: OpenAthens: Setup Tool

When you connect Koha to OpenAthens you have the ability to map attributes from one system to the other - e.g. the 'email' for a borrower could be mapped to an Email address attribute in OpenAthens. [Click here](#) to learn more about Attribute mapping.

Export Attributes for mapping

Select the following borrower details to send to Open Athens on user login.  
Note: These need to be mapped in the Open Athens Admin > Management > Connections > Local Authentication > Attributes.  
userid will be passed by default.
